SAVED

E. M. HARMON—Cured of Lung-Vita
 East Lake, Ala., Sept. 4, 1912.
 To Whom It May Concern:

I have been afflicted with lung trouble for seven years and the last three years have not been able to do any work.

I spent ten months in San Antonio, Texas, and two years in Denver, Col., trying to get well, but returned home in a much worse condition than when I left. Then I spent two months in a sanatorium, but still grew worse. I then came home and gave up to die.

I had heard of Mr. J. C. Johnson's lung medicine, but had no faith in it, as I had tried everything that anyone could mention. Then I began his treatment, and in about two weeks I began to feel like a new man and continued to improve.

I know he has saved my life, and when I die I am quite sure that it will not be of lung trouble.

I was once down to 95 pounds in weight, but have gained back to 144 pounds, only 5 or 6 pounds within my average weight. I can highly recommend Mr. J. C. Johnson's Lung Cure to anyone who has any kind of lung trouble.

Yours truly,

E. M. HARMON.

Wm. M. GRIFFIN, Notary Public,
 Nashville, Tenn., Sept. 20, 1912.
 I have been using Lung-Vita for three weeks, am feeling much stronger and have gained four pounds in weight.

T. S. WHITFIELD,
 Lenox street, R. F. D. 4.

Aug., 1911—Weight 140 Lbs.

No. 48 Carnegie Way, Atlanta, Ga., Sept. 3, 1912.

Mr. J. C. Johnson, Nashville, Tenn.

Dear Sir—I have been taking your "Lung-Vita" for about three months and have been getting some stronger, but still expectorate as much as usual. Use two sputum cups a day, and for the past week have been having high fever early in the morning and the afternoons, which, of course, is very weakening.

The last bottle I got was from Birmingham and is a great deal thicker than the other one and nauseates me so much I can't take it all during the day, so I take it at bedtime.

My lungs seem to be in the same condition as to soreness, etc.

Please advise by return mail if there is something I can take for the fever.

Do not drink milk in any form and have not since the first few doses of medicine. Have very good appetite.

The back of my lungs are in so much worse condition and have been wearing "Ordway's Plasters," which have helped me a great deal, I think. Have been keeping very late hours. Please advise the correct hours for me to sleep, etc.

Hoping to hear from you at your earliest convenience, I am,

Yours truly,

GRACE WREN.

Friday, October 25, 1912.

Mr. J. C. JOHNSON, Nashville, Tenn.:

Dear Sir—Your letter of last month received, and have tried to carry out your instructions as best I can. Am a great deal better and had a doctor listen to my lungs this afternoon, and he tells me if my lungs are affected he can't tell it, and I am sure your medicine has helped me wonderfully, and would be glad for you to send me another bottle so I will get it about the 3rd of November. Thanking you in advance, I am,

Very truly,

MISS GRACE WREN, 48 Carnegie Way, Atlanta, Ga.

P. S.—I have several acquaintances whom I am trying to induce to take your medicine and hope you will hear from them shortly.

THE DISCOVERER'S AFFIDAVIT

In July and August, 1911, I was having slight hemorrhages two or three times a week, and upon examination by a registered physician at Birmingham, Ala., was refused a policy in a life insurance company.

After using my medicine twelve months, I gained thirty-two pounds in weight, and I never enjoyed better health in my life.

J. C. JOHNSON, Nashville, Tenn.

Sworn to and subscribed to before me this, the 4th day of September, 1912.

(Seal)

ROBT. O. ALLEN, Notary Public.

My commission expires July 13, 1913.

Atlanta, Ga., June 11, 1912.

To the Public:

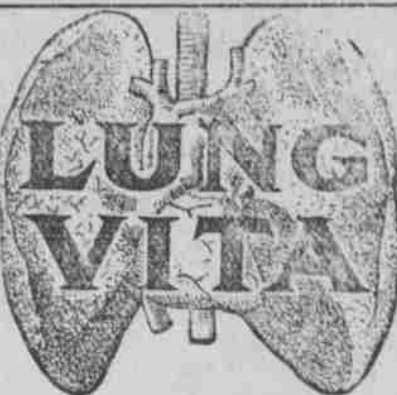

I have been a victim of tuberculosis for fully three years, and during all this time I was afflicted with a severe cough and was unable to obtain any rest during night or day; and before taking Johnson's Tuberculosis Cure I was unable for fifteen months to do any kind of labor, was forced to give up my job as conductor on the Southern Railway; I spent eight months in a sanatorium under the treatment of the best specialist in a vain effort to obtain relief or a cure of my affliction, but I was no better when I left the sanatorium, and was so weak physically that I could not speak above a low whisper.

Five weeks ago I secured a bottle of Johnson's Tuberculosis Cure, and I immediately began to get relief, and am now able to rest comfortably at night. I am gaining strength and vitality very rapidly, and can truthfully say that I feel stronger today physically than I have before for fifteen months, although I have only taken one bottle of the medicine. I am able to walk anywhere and take a reasonable amount of exercise; I have a good appetite, and after having tried almost every remedy and after having consulted the greatest and leading specialists in the United States, and having been treated and spent a fortune without any good result, I can truthfully say, without fear of contradiction, that Johnson's Tuberculosis Cure has done me more good, has quicker put me on my feet and has given me more vim, vigor and vitality than all the other treatments that I have been receiving, and I have not the slightest doubt that before the year 1912 rolls around I will be a sound man. Too much can not be said in praise of and in behalf of the merits of Johnson's Tuberculosis Cure.

I live at No. 181 Plum Street, Atlanta, Ga., and will be glad to answer any inquiries from any one who is so unfortunate as to be afflicted with the fearful malady, tuberculosis.

Very truly,

W. W. NASH.

DON'T DESPAIR

Lung-Vita

Has Cure Many

Mrs. R. L. Neese, residing at 2204 Oakland Avenue, Birmingham, Ala., has the following to say of our treatment:

"I was in a desperate condition, and had a hemorrhage on Jan. 8 which lasted three hours. I had another on Jan. 9 which lasted four hours. I began the use of Johnson's Lung-Vita which stopped the hemorrhages at once. I had such a severe cold that I could not sleep at night, but after three weeks' treatment my cough ceased. I gained eight pounds after six weeks' treatment, and grew strong enough to sit up.

"I now have no cough at all, nor any symptom of lung trouble. I have had three different physicians to examine me, and all three say that I have now no sign of lung trouble. I had been given up to die by other physicians, who said that I could not possibly live more than two months."

This statement was made by Mrs. Neese on June 20, five months after she began my treatment.
